Outcome 6

Rural Health

**OUTCOME SUMMARY**

Outcome 6 focuses on improving access to health services for people living in regional, rural and remote areas. The Australian Government aims to achieve this outcome by supporting a diverse range of rural health programs and activities. The Government also funds a number of other rural health initiatives across other portfolio outcomes.¹

Outcome 6 is the responsibility of the Primary and Ambulatory Care Division.

**The Year Ahead**

In 2007-08, the Australian Government will continue to help people in rural and remote areas to access health services, by funding initiatives under the Rural Health Strategy. This includes programs which fund specialist and allied health services, and primary care in rural and remote Australia. Also included are health promotion and prevention initiatives, emergency evacuations and initiatives to support a greater range of privately insurable health services in these areas. During the year, the Government will focus on maintaining access to care through the Royal Flying Doctor Service.

**Key Strategic Directions for 2007-08**

During 2007-08, the Australian Government will:

- ensure the long-term sustainability of the Royal Flying Doctor Service.

Under other outcomes, the Government will also:

- improve access to optometric services for people in rural and remote communities (Outcome 3);
- continue to support training for GP registrars in rural and urban areas (Outcome 5);
- improve access to female general practitioners in rural and remote areas (Outcome 5);
- support general practitioners and medical specialists to train and work in locations with an identified undersupply, including rural areas. Focus will also be on attracting medical students to these areas (Outcome 12); and
- continue to support growth at Rural Clinical Schools and University Departments of Rural Health to deliver more rural training opportunities for students (Outcome 12).

¹ A list of rural health initiatives by outcome can be found later in this chapter.
Major Activities

New Funding Arrangements for the Royal Flying Doctor Service

The Australian Government conducted a national review of the Royal Flying Doctor Service in 2005-06 to examine its operational activities, funding and governance arrangements. The review found that additional recurrent funding and the introduction of capital funding was required to improve the organisation’s sustainability. It also identified the need for national governance reform.

In 2007-08, the Government will increase funding to the Royal Flying Doctor Service for operational and capital costs, including aircraft replacement, emergency aero-medical evacuations and primary health care services. Funding will also support governance-related initiatives to allow the organisation to operate on a stronger national basis.

The Department has worked in consultation with the Royal Flying Doctor Service and state and Northern Territory health departments to develop new funding arrangements. The arrangements are scheduled to commence in 2007-08.

### Measures Affecting Outcome 6

A summary of measures affecting this outcome is provided at Table 2.2, Section 2. Measure descriptions are published in full in *Budget Paper No. 2, Budget Measures 2007-08*, available on the Australian Government website at: <www.budget.gov.au>.

### Contribution of Administered Programs to Outcome 6

**Program 6.1: Rural Health Services**

The Rural Health Services program funds a range of services in rural and remote areas, including specialist, allied and community health services. It supports emergency evacuations and privately insurable health services. The program also provides funding for coordination grants for small community health care services, and prevention and promotion activities in remote communities.
Contribution of Departmental Outputs to Outcome 6

The Department describes its core activities in terms of two output groups: policy advice and program management. Outcome 6 reports on both output groups. Refer to Section 3.1 for more information on output groups.

Performance Information for Outcome 6

Performance information for administered programs, individual outputs and output groups relating to Outcome 6 are summarised in Table 3.2.6.

**Evaluations**

The Department does not plan to undertake any evaluations under Outcome 6 in 2007-08.

**Major Reviews**

The Department does not plan to undertake any major reviews under Outcome 6 in 2007-08.

**Other Performance Improvement Initiatives**

The new funding arrangements for the Royal Flying Doctor Service will aim to improve the long-term viability and sustainability of the organisation. In order to support this objective, the new funding arrangements will require a systematic and streamlined approach to the measurement of the outputs funded; the provision of meaningful information about the efficiency and effectiveness of the services delivered; and national governance reform initiatives. This approach will enable the Australian Government to monitor and review the effective implementation of the new funding arrangements and identify further improvements.
